Patient Consent Form for Appointment Text Messages

Whole Health Concord uses text message reminders for appointments and for alerts to let you know any supplements you may be waiting for are ready for pick up.

Text reminders go out the week before and the day before of each appointment from our scheduling system.

The Telephone Consumer Protection Act (TCPA) requires medical practices to get each patient's consent to text or call with appointment reminders. This form is asking for that consent, and confirming that you understand that all charges from those calls and texts are your responsibility and you accept them. Additionally, if you do NOT want either of these please indicate below so we can note that in your chart and make sure you do not receive these types of reminders.

I, _____, (first and last name) would like to receive:

Text appointment reminders ____ (initial)

For text: _____ (mobile phone number)

I understand the above and I accept all charges associated with text reminders if selected above.

Signature: _____ Date: _____
